Spencer Brook Township
Snow Removal Policy
2026-2027
Reviewed & approved 9/14/2026

Spencer Brook Township's primary goal is to provide a safe & passable road surface within a reasonable amount of time. The Township will dispatch plows after a snowfall of 3 ½ inches or more and at the discretion of the Town Board. Snowfall occurring over several days will be plowed more often.

Please remember flashing amber, and blue lights identify snow removal equipment, and motorists should maintain a 150-foot minimum following distance. The Township does not guarantee a clean & dry road surface, and will most likely not sand entire sections of roadway. The Township will sand intersections, curves, and hills as their top priority. Residents are also reminded to use caution while driving, as the legal speed limit may not be safe or reasonable during winter weather conditions.

The Township will evaluate, on a case-by-case basis, any mailboxes damaged by the Township snowplows. Only those mailboxes installed per MN/DOT specifications, and struck by the plow itself, will be repaired at the Township's expense. It is unlawful to plow snow from one's driveway onto or across the Township Road. This creates a hazardous situation for all drivers. Any snow piles in the road right-of-way will be removed at the property owner's expense. Please remove vehicles from the roadway during times of snowfall, or they may be towed at the owner's expense. MN statute 160.2715.

The Spencer Brook Town Board reserves the right to make changes to the above policy as needed for fire, medical, or law enforcement emergencies. Please contact the Township Office at 763-389-0012, or Jennifer at 763-444-3870 with any questions, or snow issues.
